Current Religious Attendance and Structure of Family of Origin Combined

“Females Under the Age of 18 at First Sexual Intercourse”
by Structure of Family of Origin

These four quadrants are derived from combining two sets of family structures (always-intact vs. non-intact*) and two sets of religious attendance (high vs. low).

The families occupying the four corners (or four extremes) of these quadrants are:

- The always-intact married family that worships weekly;
- The always-intact married family that never worships;
- The non-intact family* that worships weekly;
- The non-intact family* that never worships.

(* The non-intact group consists of women in the following categories: married stepfamily, cohabiting stepfamily, single divorced parent, and always single parent. In all these structures, there has been rejection between the biological father and mother, and thus the original pairing is no longer intact.)

Females Who Had Sexual Intercourse before Turning 18 Are More Likely to Worship Infrequently and to Have Grown Up in Non-Intact Families

Women who now worship weekly and who grew up in an intact married family are the least likely to have had sexual intercourse before age 18, when viewed from the perspective of family structure and religious attendance.

According to the National Survey of Family Growth, 41.6 percent of women who grew up in intact married families and now worship at least weekly had sexual intercourse before turning 18, followed by women who grew up in intact married families and now never worship (59.8 percent), those who grew up in other family structures and now worship at least weekly (68.1 percent), and those who grew up in other family structures and now never worship (80.3 percent).

Examining structure of family of origin only, 52 percent of women who grew up in intact married families had sexual intercourse before turning 18, followed by women from intact cohabiting families (64.7 percent), single divorced parent families (71.7 percent), married stepfamilies (76.7 percent), always single parent families (78.8 percent), and cohabiting stepfamilies (84.3 percent).

Examining current religious attendance only, 50.7 percent of women who worship at least weekly had sexual intercourse before turning 18, followed by those who attend religious services between one and three times a month (61.6 percent), those who attend religious services less than once a month (66.8 percent), and those who never attend religious services (69.8 percent).¹

Related Insights from Other Studies

Several other studies corroborate the direction of these findings. Sam Hardy and Marcela Raffaelli of the University of Nebraska-Lincoln reported that “higher religiosity at 15-16 years was significantly associated with still being a virgin 2 years later.”²

Jill Sinha of Princeton University and colleagues also found that “[b]oth attendance in worship services and participation in a religious youth group were negatively correlated with sexual activity.”³

Cristina Lammers of the University of Uruguay and colleagues reported that adolescents under “17 years of age, from two-parent families, were more likely than peers from single-parent families to delay sexual intercourse.”⁴

Mignon Moore of Columbia University and P. Lindsay Chase-Lansdale also found that teenagers living in single mother families have a greater chance of sexual debut than those living in married families.⁵

Dawn Upchurch of the University of California, Los Angeles and colleagues reported that “[t]eenagers living with a single parent or in a stepfamily had significantly higher rates of transition to first sex than did those living with both biological parents.”⁶

As the evidence indicates, women who grew up in an intact family and who worship weekly are less likely to have had sexual intercourse before turning 18.

Patrick F. Fagan, Ph.D. and D. Paul Sullins, Ph.D.

Dr. Fagan is senior fellow and director of the Marriage and Religion Research Institute (MARRI) at Family Research Council.

Dr. Sullins is an associate professor of sociology at The Catholic University of America.
