

The Real Planned Parenthood: Leading the Culture of Death 2017 Edition

Arina O. Grossu

The Basics

- Planned Parenthood Federation of America (PPFA) is the primary provider of abortions in the U.S. According to PPFA's most recent 2015-2016 annual report, it committed 328,348 abortions in fiscal year 2015, up by 4,349 abortions since 2014.¹
- According to these numbers, Planned Parenthood aborted 900 babies every single day in 2015.
- In other words, a baby was aborted every 96 seconds at a Planned Parenthood facility in the U.S. in 2015.
- According to a January 2017 Guttmacher Institute report, 926,200 abortions were committed in 2014.² In 2014, 323,999 abortions were committed by Planned Parenthood and its affiliates.³ Therefore, in 2014 Planned Parenthood was responsible for 35% of all abortions committed in the U.S., an increase from 31.5% in 2011.
- From 2011-2015, Planned Parenthood committed over 1.6 million abortions (1,641,130).⁴
- Additionally, between 2011-2015 Planned Parenthood gave out an average of 1.24 million emergency contraception kits annually.⁵ Emergency contraception, such as Plan B, can kill a human embryo if fertilization has already occurred.⁶
- As of mid-June 2017, there are 635 Planned Parenthood facilities in the U.S. and 56 regional affiliates,⁷ but Planned Parenthood will close 15 facilities by August 2017, thus dropping the number to 620 Planned Parenthood facilities.⁸ Both the numbers of facilities and affiliates continue to drop each year and are at an all-time low. Last year 20 Planned Parenthood facilities closed.⁹ At its height in 1995, there were 938 Planned Parenthood facilities. With 620 facilities in 2017, there was more than a one-third decrease in the number of affiliates. Affiliates have also consistently dropped from 190 in 1983 to 56 in 2017, a 71% decrease.¹⁰

A Decrease In Services¹¹

- Planned Parenthood reported 2.5 million patients in 2014 and 2.4 million patients in 2015. Planned Parenthood had 100,000 less patients in 2015, for a decrease in patients of 4% in a year.
- From 2009 to 2015, cancer screening and prevention programs have consistently decreased by close to two-thirds (64%): 1,830,811 (2009), 1,596,741 (2010), 1,307,570 (2011), 1,121,580 (2012), 935,573 (2013), 682,208 (2014), and 665,234 (2015). Despite the 64% decrease in screening

services, Planned Parenthood continues to tout its screening efforts as a major part of its public advertising.¹²

- During those same years, HPV Vaccinations, Colposcopy procedures, and Cryotherapy procedures all decreased with each consecutive year.
- From 2009 to 2015, breast exams have consistently decreased by over half (61%): 830,312 (2009), 747,607 (2010), 639,384 (2011), 549,804 (2012), 487,029 (2013), 363,803 (2014), and 321,700 (2015). In 2015, for the first time in Planned Parenthood's history, abortions outnumber basic breast exams. These numbers do not include in-house mammograms because Planned Parenthood does not provide that service.¹³ In a September 2015 House Oversight Committee meeting, Cecile Richards admitted that Planned Parenthood does not provide mammograms, contradicting her 2011 claims that it did.¹⁴
- From 2009 to 2015, prenatal services have steadily decreased by more than three-quarters (77%): 40,489 (2009), 31,098 (2010), 28,674 (2011), 19,506 (2012), 18,684 (2013), 17,419 (2014), and 9,419 (2015). Planned Parenthood's reported prenatal services dropped by more than half (54%) between 2014 and 2015 alone. In 2015, Planned Parenthood committed 35 abortions for every prenatal service it provided.
- From 2011 to 2015, PPFA averaged 2,258 adoption referrals annually. The following are total adoption referrals by year: 2,300 (2011), 2,197 (2012), 1,880 (2013), 2,024 (2014), and 2,889 (2015). In 2015, Planned Parenthood committed 114 abortions for every adoption referral it made.
- According to Planned Parenthood's 2015-2016 report, out of total services for pregnant women (adoption referrals, prenatal services, abortion), abortion accounted for 96%.¹⁵ Adoption referrals made up less than 1% of pregnancy services and prenatal services made up less than 3% of pregnancy services.

2015 Report: New Categories

- In 2015, Planned Parenthood added two new categories to its annual report: "well-woman exams" (226,254) and "miscarriage care" (2,073). Neither of these services is defined.
- In 2014, former Planned Parenthood director Abby Johnson wrote that in her Planned Parenthood protocol book there was one called "Miscarriage Management" that was "in preparation for when abortion [was] made illegal" and it gave step by step instructions on how to help women with self-abortions. Johnson wrote: "We would instruct women to take medications and/or vitamins to end their pregnancy. Some of those on the list were Vitamin C, Black or Blue Cohosh, or Misoprostol bought online. We would give them instructions on how much they needed to ingest in order to terminate their pregnancy. We would give them warning signs...signs to help them decide if they needed to go directly to the emergency room. If everything went as planned, they would be instructed to come to our facility for an ultrasound to confirm fetal demise and an MVA (Manual Vacuum Aspiration). This would not technically be considered an abortion since the death of the child had happened outside our facility. Of course, there would also be a fee for this "miscarriage management" service."¹⁶

The 3% Abortion Myth

- Planned Parenthood reports its health services data in a manipulated fashion to underemphasize abortion-related services. PPFA states that abortion makes up approximately “3% of total services.”¹⁷ However, in 2011 National Public Radio clarified that a more accurate percentage of Planned Parenthood clients who have an abortion would be 10%.¹⁸
- Since Planned Parenthood committed 328,348 abortions in 2015-2016 and saw 2.4 million people, and if the abortions were given to individual patients,¹⁹ then 14% of all their patients received abortions.
- While Planned Parenthood downplays its abortion statistics, it often highlights its non-abortion services by counting services to a single client as separate services.²⁰ For example, a pap smear, a pregnancy test, birth control packet, and STD testing done in one visit for one person are unbundled and counted as four different services, thus skewing their numbers. This is how Planned Parenthood claims to have provided almost 9.5 million services of which 328,348 are abortions, thus arriving at the 3% number.²¹ The gravely misleading number deliberately minimizes its abortion rate and fails to put into perspective the fact that Planned Parenthood’s “3%” abortion services make up over one-third of the total number of U.S. abortions annually and that it is America’s number one abortion chain.
- Even Slate’s Rachael Larimore called the 3% number the “most meaningless abortion statistic ever” ... “to the point of being downright silly.”²² *The Washington Post* also called it “misleading” in its Fact Checker section.²³

Planned Parenthood’s Abortion Quotas

- Planned Parenthood has abortion quotas. Former Planned Parenthood Center Director Sue Thayer stated in an interview that her job required her to be “accountable for how many patients you see, and if you’re not seeing enough, why; and you need to have an action plan for [meeting the required number].” She went on to say that every center in Iowa (where she worked) “had a goal for how many abortions they needed to do.”²⁴
- In addition, former Planned Parenthood facility director Abby Johnson received confirmation in 2014 that the Planned Parenthood of the Rocky Mountains gave an award to the Planned Parenthood of Aurora, Colorado “for exceeding abortion visits in the first half of FY12 compared to first half of FY13.” Johnson went on to say, “Planned Parenthood has responded and has confirmed that, YES, this is an award that was given out by them. And, YES, they will continue to “celebrate their progress and they always will.”²⁵

Taxpayer Funding of Planned Parenthood

- While Planned Parenthood holds non-profit status, its total revenue for 2015-2016 was about \$1.354 billion, the highest in its history. In 2015-2016, PPFA reported an excess of revenue over expenses of \$77.5 million, an increase of almost \$19 million in a year alone.²⁶
- In 2015-2016, Planned Parenthood received \$554.6 million in combined federal, state and local government grants and contracts, an increase of \$900,000 since the year prior, and the highest in government funding that Planned Parenthood has ever received. Of all funding received by Planned Parenthood, 41% comes from taxpayers’ pockets.²⁷

- The 2015-2016 report also shows \$541.2 million in unrestricted net assets, funds which Planned Parenthood can use, should it lose its government funding.
- The federal government, on average, funds Planned Parenthood through various programs with about \$100 million in grants, contracts, and reimbursements per year: \$94.5 million (2002), \$88.5 million (2003), \$86.7 million (2004), \$93.7 million (2005), \$100 million (2006), \$97.6 million (2007), \$96.2 million (2008), unreported (2009),²⁸ \$126.2 million (2010), \$112.7 million (2011), \$105.6 million (2012).²⁹
 - Between 2002-2008, the federal government gave Planned Parenthood \$657.1 million in grants, contracts, and reimbursements.
 - Between 2010-2012, the federal government gave Planned Parenthood \$344.5 million in grants, contracts, and reimbursements.
- Additionally, the federal government funds Planned Parenthood in large “mandatory” programs such as Medicaid, Medicare or CHIP by even larger sums. Medicaid is a federal program involving both federal and state funding. This federal program funded Planned Parenthood between 2010-2012, by nearly \$1.2 billion averaging \$400 million per year: \$386.05 million (2010), \$397.83 million (2011), and \$400.56 million (2012).³⁰
- The total amount of taxpayer funds in federal programs that went to Planned Parenthood between 2010-2012 was over \$1.5 billion: \$344.5 million in federal grants, contracts, and reimbursements and \$1.2 billion in Medicaid. This averages out to over \$500 million in federal programs going to Planned Parenthood each year.³¹

Planned Parenthood: A Scandal-Ridden Organization

- In January 2017, LiveAction released video and audio investigations concerning Planned Parenthood’s claims to provide prenatal care. Their videos reveal that less than 1% of the interviewed facilities actually provide prenatal care.
 - Out of 97 Planned Parenthood facilities that they talked to, only 5 said they provided prenatal care.³²
 - Another video revealed that of 68 Planned Parenthood facilities that were asked if they do an ultrasound in order to check the health of the baby,³³ only 3 Planned Parenthood facilities said they did.
- Starting in July 2015, the Center for Medical Progress released a number of undercover videos taken of meetings with national leaders of Planned Parenthood discussing the sale of organs harvested from aborted babies.³⁴
- The videos provide evidence for possible illegal activities in addition to profiting on the sale of organs from aborted babies. These include possible violations of laws requiring women be provided informed consent when their baby’s organs are being donated for research, changing the position of the unborn child illegally to more easily obtain organs from the aborted babies, possibly partially delivering the baby to better harvest their organs in violation of the Partial Birth Abortion Act, and possibly even allowing babies to be born alive before harvesting their organs.

- This series of videos prompted investigations into Planned Parenthood by multiple Congressional Committees as well as by multiple states.³⁵ The Select Panel on Infant Lives made fifteen criminal and regulatory referrals in December 2016, two of which directly involved Planned Parenthood facilities.³⁶
- Undercover investigations by Live Action suggested that Planned Parenthood had not been reporting statutory rape at a number of its affiliates.³⁷ News stories show that these incidents are not isolated. In 2011, seven Planned Parenthood affiliates in New Jersey, New York, Virginia, and D.C. were recorded on video being complicit in covering up child prostitution and sex trafficking.³⁸
- Planned Parenthood has also shown support for gendercide. “Protect Our Girls,” Live Action’s 2012 video project highlighting gendercide in America, exposed Planned Parenthood affiliates in Texas, Arizona, New York, Hawaii, and North Carolina encouraging women to get sex-selective abortions for unborn girls they did not want.³⁹
- Live Action’s 2013 sting operation “Inhuman” reveals Planned Parenthood’s complicity with late-term abortion.⁴⁰ The Guttmacher Institute reports that 1.2% of abortions are of babies 19 weeks post-fertilization and older.⁴¹ This means almost 13,000 American pain-capable⁴² unborn children die from late-term abortion each year.
- Planned Parenthood of Indiana has been accused of endangering the safety and well-being of minor girls by intentionally circumventing state parental involvement laws and breaking state law by refusing to report statutory rape.⁴³ Planned Parenthood of Ohio was convicted of not enforcing parental consent laws in the case of a 14-year-old who got pregnant by her soccer coach.⁴⁴ In 2014, an Arizona Planned Parenthood failed to report the rape of a teenage girl, which allowed the man to rape 18 other girls.⁴⁵ The sheriff’s office report in this case stated, “The counselor intentionally miscoded the assault as a consensual encounter...the counselor told them that they did not want the hassle of having to report the assault to law enforcement as they were a mandatory reporter.”⁴⁶
- In 2009, Alliance Defending Freedom (ADF, formerly Alliance Defense Fund) released a report that details federal and state audits of Planned Parenthood affiliates from 1995-2009, specifically highlighting Texas, California, Washington, and New York. These audits convey that these individual affiliates were responsible for over \$95 million in waste, abuse and potential fraud. Examples include giving prescriptions without authorization from a medical practitioner and misusing government funds to over-bill patients for family planning.⁴⁷ Planned Parenthood of California was also accused of overcharging the state and federal governments by \$180 million for birth-control pills, despite internal and external warnings that its billing practices were improper.⁴⁸
- Susan Thayer, former Planned Parenthood director, testified in an October 2015 Congressional hearing that she filed a federal False Claims Act complaint against Planned Parenthood alleging that it “filed false claims totaling about \$28 million with Iowa’s Medicaid program for (1) illegally dispensing “medically unnecessary” quantities of oral contraceptive pills and birth control patches to C-Mail Medicaid patients and doing so without a prescription; (2) fraudulently billing the Iowa Medicaid program for abortion-related services; and (3) coercing “donations” from Medicaid patients.”⁴⁹

- Planned Parenthood promotes itself as a “non-partisan” organization, yet promised supporters to turn out millions of votes and provide substantial financial support to elect pro-abortion candidates to the White House, Congress, and state governments, as it works to weaken and overturn pro-life laws at all levels.⁵⁰ In 2012, the two Super PACs associated with Planned Parenthood spent over \$15 million on the 2012 election, including \$8 million on negative ads targeting Mitt Romney.⁵¹ Also in 2012, President Obama proclaimed his support for Planned Parenthood through a YouTube video he made for Planned Parenthood Action Fund supporters.⁵²

Planned Parenthood, Target Populations, and Eugenics

- The founding of Planned Parenthood is directly tied to the eugenics movement. The movement’s ultimate goal was the elimination of certain groups of “unfit” or “feeble-minded” people.⁵³
- Planned Parenthood targets minority populations: 79% of its surgical abortion facilities are located within walking distance of African American or Hispanic/Latino neighborhoods.⁵⁴
- Minorities account for almost two-thirds (64%) of all abortions in the U.S. (this includes Hispanic, Black Americans, and all non-white Americans).⁵⁵ Black children are aborted at about five times the rate of white children.⁵⁶
- In a series of sting videos produced by Lila Rose, head of the organization Live Action, it was revealed that as many as seven Planned Parenthood facilities were willing to accept donations earmarked as abortion money according to race.⁵⁷

Planned Parenthood also targets college students: 79% of Planned Parenthoods are located within five miles of a college campus.⁵⁸

There Are Better Options Than Planned Parenthood

- Planned Parenthood facilities will be down to 620 by August 2017. There are 13,540 federally-qualified, low-cost, high quality health care clinics and rural health centers. They outnumber Planned Parenthood more than 20 to 1 nationally.⁵⁹ Women have real choices when it comes to healthcare and they can find one of these clinics at GetYourCare.org.
- These federally-qualified health centers not only offer screening and prevention services, pap smears, cancer screenings, breast exams, and prenatal services, but they also offer a full spectrum of other primary care services that Planned Parenthood fails to provide:
 - Mammograms
 - A variety of immunizations
 - Diabetes and glaucoma screenings
 - Cholesterol screenings
 - Cardiovascular screening blood tests
 - Thyroid function tests
 - Eye, ear and dental screenings
 - Preventive dental services
 - Well-child services
 - Medical nutrition services
 - Bone mass measurement
 - Social worker services
 - Mental health services
 - Substance abuse services
 - Emergency medical services
 - And others⁶⁰

- Federally-qualified health centers offered services for 21.7 million patients in 2013⁶¹ compared to Planned Parenthood who served 2.7 million.⁶² That’s over eight times as many patients.
- In 2014, federally-qualified health centers served approximately 23 million people.⁶³
- With an extra half a billion in taxpayer funds that currently goes to Planned Parenthood, these federally-qualified health centers could grow and expand their reach.
